Subject: Microsoft Settlement

Microsoft is a monopoly. You do not need 100% of the market to be a monopoly.

1. Open source **ALL** of the "Internet Explorer" web browser program code.
2. Make them develop a version of "Internet Explorer" and MS Office for Linux.
3. Tell them under **NO** circumstances, can they collect **private information** from there customers using there operating system or applications.
4. All of there current and future protocols must be **approved** by a open standards organizations.
5. Fine them 25 to 50 percent of there **NET** profit. That will help the national debt.

Thank you for your time and help in this matter.

Donald Carrico Jr.
